

The President Has Been Shot: Confusion, Disability, And The 25th Amendment

HISTORY

"THE PRESIDENT HAS BEEN SHOT"

*Confusion, Disability, & the 25th Amendment
With a New Postscript: The 1992 Election Campaign*

Herbert L. Abrams

This is a detailed study of the medical and political events surrounding the attempted assassination of Ronald Reagan on March 30, 1981, the deception of the public about the seriousness of his condition, and the refusal of White House officials to transfer power temporarily to Vice President Bush in accordance with the 25th Amendment to the Constitution. For this paperback edition, the author has written a new Postscript on the election of 1992 and "the public's right to know." It covers the health problems and disclosures of Bush, Tsongas, Buchanan, Perot, and Clinton in light of the issues of privacy and confidentiality.

"Abrams has written an important analysis of the little-known 25th Amendment. . . . It reads like a spellbinding political thriller. . . . This is a meticulously verified account of panic and intrigue in the Reagan White House, of misbehavior by all the president's men, and of their inexcusable failure to obey the Constitution's clear command."
—*San Francisco Chronicle*

"A superb and engrossing book. . . . Dr. Abrams has performed an extraordinarily useful task in producing this timely review of an important medical, legal, and political problem."
—*New England Journal of Medicine*

"A valuable addition to the growing literature of presidential succession."
—*New York Times*

"A compelling reconstruction of the attempted assassination and its aftermath."
—*Boston Globe*

"A superb writer, Abrams sorts out an extraordinarily complex time and moves his readers from one scenario—situation room might be more accurate—to another at crisis speed. . . . This book is a very readable start in the process of public education."
—*Louisville Courier-Journal*

Herbert L. Abrams, M.D., is Professor of Radiology and a member-in-residence of the Center for International Security and Arms Control at Stanford University. He was a founder of International Physicians for the Prevention of Nuclear War, recipient of the 1985 Nobel Peace Prize.
