

# Proceedings, Computer Networking Symposium: A Symposium

Technically-sponsored by:

IEEE  
IEEE ComSoc  
IEEE Communications Society

HRVATSKA  
ACM  
veštica

In cooperation with:  
International  
Symposium Committee

**Symposium co-chairs:**  
Antonio Capone  
Politecnico di Milano, Italy  
and  
Josip Lorincz  
University of Split, Croatia

**Committee members:**  
Manco Almone Marzan, Institute  
IMDEA Networks, Spain  
Ulrich Barth, Alcatel-Lucent/  
Bell Labs, Germany  
Luca Chiaraviglio, University of  
Rome Tor Vergata, Italy  
Ken Christensen, University of  
South Florida, USA  
Manco Conti, Institute for  
Informatica and Telematica, Italy  
Lingjia Liu, University of  
Kansas, USA  
Mario Pickavet, Ghent  
University, Belgium  
Michela Mei, Politecnico di  
Torino, Italy  
Haijun Zhang, University of  
British Columbia, Canada  
Honggang Zhang, Zhejiang  
University, China  
Jinsong Wu, Universidad de  
Chile, Chile

25th International Conference on Software, Telecommunications and Computer Networks  
**SoftCOM 2017**  
Split, Croatia, September 21 – 23, 2017  
**8th SYMPOSIUM ON:  
GREEN NETWORKING & COMPUTING (SGNC 2017)**  
**Symposium Co - Chairs:**  
Antonio Capone and Josip Lorincz  
Politecnico di Milano - DEIB, Italy (capone@elet.polimi.it) / University of Split - FEISB, Croatia (lorincz@fesb.hr)

**Call for Papers**  
The 8th Symposium on "Green Networking and Computing" (SGNC 2017) will be held in the frame of the 25th International Conference on Software, Telecommunications, and Computer Networks (SoftCOM 2017). Since 2010, the Symposium is organized in the frame of the SoftCOM conference which will take place on September 21-23, 2017, in the attractive ambience of the Croatian side of Adriatic coast. In the frame of Symposium, the eight Special Session on green networking, invited talks, tutorials and business forum will be organized. Conference is organized in cooperation with the IEEE Technical Committee on Green Communications and Computing (TCGC2C).

The topic of "green networking" is attracting growing attention for economic, energetic, and environmental reasons. The rapidly increasing amount of power consumed by ICT, as well as the energy bills of service providers, contributes to the economic reasons. According to a number of studies, ICT alone is responsible for between 2 and 10% of world power consumption, due to the ever-increasing diffusion of electronic devices. Communication networks, including the Internet and wireless networks, represent a non-negligible part of the energy consumption of ICT. In addition, the carbon footprint of ICT devices due to energy consumption and the activities related to their entire lifecycle contributes to global warming. In the very last years, energy-saving techniques are being considered for communication networks with new generation devices and network management approaches exploiting algorithms and protocols for adapting the network to the varying traffic load. The Symposium on "Green Networking and Computing" aims to serve as a platform for researchers and visionaries from academic, research labs, and industry from all over the world. Sharing ideas, views, results, and experiences in the field of green wired and wireless networking is what the "Green Networking and Computing" Symposium is intended to be about, anything from theoretical and experimental achievements to innovative design and management approaches, prototyping efforts, and case studies is of interest.

- Topics of interest include, but are not limited to the following:
- Power consumption models of networking infrastructure
  - Power measurements and data from empirical studies of communication networks
  - Techniques for reducing power consumption in data centres
  - Hardware and architectural support for reducing power consumption
  - Energy efficient network management and internet of things (IoT)
  - Green network design and energy-efficient smart grids
  - Applications of green networking technologies and principles
  - Cross-layer optimizations for reducing energy consumption
  - Optimization of energy consumption in optical networks
  - Energy-efficient protocols and protocol extensions
  - Energy-efficient transmission technologies
  - Energy-efficient peer-to-peer networking and overlays
  - Energy-efficient cloud computing and network function virtualisation
  - Green wireless access networks and energy-efficient fog computing
  - Green wired access networks
  - Green future internet and software-defined networking
  - Energy cost models for network operators
  - Energy-efficient sensor networks
  - Renewable energy sources for wired and wireless access networks
  - Antenna design and transmission technologies for reducing energy consumption

Accepted and presented papers will be published in the conference proceedings, and submitted to IEEE Xplore as well as other Abstracting and Indexing (A&I) databases.

**IMPORTANT DATES**  
Complete manuscript due: May 20, 2017  
Notification of acceptance: July 01, 2017  
Camera-ready manuscript: September 1, 2017

More information about the Conference including details on the submission process and authors kit is available on the website:  
<http://softcom2017.fesb.hr>  
Symposium contact person: Josip Lorincz, University of Split, Croatia (josip.lorincz@fesb.hr)  
SoftCOM conference contact: softcom@fesb.hr

Results 1 - 25 of 49 The authors are concerned with access policies for networks using multi-rate circuit switching. The access node consists of F bandwidth units. Get this from a library!
